

# Federal Funding for Kajeet Education Connectivity Solutions

Technology funding continues to be one of the biggest challenges facing districts and schools today. Currently, there are **more than 900 federal technology funding programs available** that can be used to purchase and develop new or existing technologies, enhance students' computer skills, provide teacher training, increase parent involvement in schools, and compile critical data to improve a schools' overall academic achievement.

|-----------------------------------|---|
| <b>COVID-19 Relief Funding</b>    | The COVID-19 pandemic and resulting shift to distance, hybrid, and blended learning environments has heightened the demand for digital tools, devices, and Internet connectivity for students. The federal government has responded to this pressing and widespread need through a series of relief funding. Between the recently passed <b>American Rescue Plan</b> (\$7.2B towards K-12 home connectivity), <b>CRRSA Act</b> (\$54.3B), and <b>CARES Act</b> (\$13.2B), there is a large pool of funding sources available to support K-12 technology solutions like those offered by Kajeet. |
| <b>Title Programs</b>             | A provision of the ESEA, Title programs identify public schools and districts with high percentages of students from low-income, homeless, or abusive families and outlines how its \$15.4 billion in available funding can be allocated to support them. Many of these programs, especially <b>Title I, III, IV, VI, and VIII</b> , contain allocations aimed at advancing digital equity through student connectivity solutions like Kajeet.  |
| <b>Additional Funding Sources</b> | The <b>Individuals with Disabilities Act (IDEA)</b> , <b>Education Innovation and Research (EIR) Program</b> , and <b>Charter Schools Program (CSP)</b> all contain provisions aimed at supporting the use of educational connectivity solutions like Kajeet for students.  |

## KAJEET IS A LEADING PROVIDER OF SECURE WIRELESS CONNECTIVITY SOLUTIONS FOR EDUCATION.
