

Federal Funding for Kajeet Education Connectivity Solutions

Q: What is your school or district's plan to provide connectivity to students who do not have Internet at home?

A: Kajeet provides wireless connectivity solutions that are ideal for supporting students who do not have Internet access at home.

Q: What, if anything, is holding you back from exploring Kajeet connectivity solutions for your students?

A: Funding continues to be a major challenge facing school and district administrators. There is a variety of federal funding sources that can be leveraged for the purchase of Kajeet solutions.

Q: Have you explored any of the available funding sources that can be used for onboarding with Kajeet solutions?

A: If so, reference the Kajeet Funding Guide to learn more about the specific funding they mention. If not, check out the provisions of COVID-19 relief funding (The American Rescue Plan, CRRSA Act, CARES Act), as well as the list of Title (I, II, III, IV, VI, VIII) programs, FCC Emergency Broadband Benefit Program, IDEA, Education Innovation and Research (EIR) Program, and Charter Schools Program (CSP). More info in the Kajeet Funding Guide.

Q: How can I use these funding sources towards my Kajeet purchase?

A: While the specific provisions vary between specific federal grants and programs, most allowable uses include the purchase of technology that helps underprivileged students succeed and keep up with their peers. Through the secure, reliable, multi-network wireless connectivity offered by Kajeet solutions, students are able to safely access online educational tools and grow into confident digital citizens.
