

InCharge as a Service

Turn-key and Inclusive Fleet Electrification Solutions

MAKE ELECTRIFYING YOUR FLEET SIMPLE AND AFFORDABLE

A comprehensive fleet electrification charging solution that provides top-tier reliable charging without the upfront costs and the stress of directly owning, operating and maintaining the infrastructure.

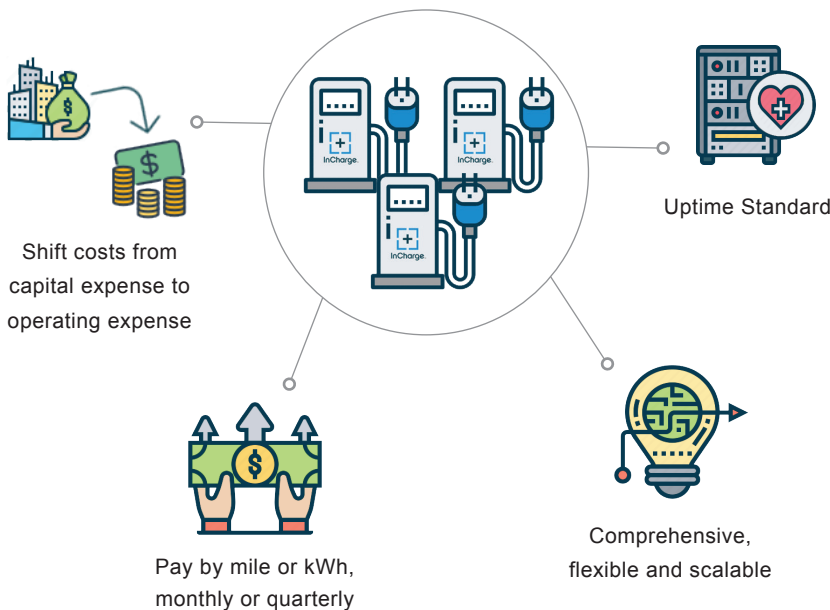

CHARGING AS A SERVICE

InCharge's Charging as a Service wraps everything required to electrify a fleet into a simple and predictable monthly utilization fee, including site design, charging hardware, installation, operations and maintenance and our industry-leading fleet software management tool, InControl™.

FLEET AS A SERVICE

Charging infrastructure is only half of the equation. With Fleet as a Service, the price of your electric vehicles and associated costs are converted into an operational expense as well, either by the mile, kWh, or a fixed fee transferring high upfront capital expenditures into operational costs and hassle-free fleet operations.

ALL-INCLUSIVE HASSLE-FREE CHARGING

CaaS INCLUDES

- Planning: route analysis, charging requirements, charge scheduling, etc.
- Design, Engineering & Permitting
