Features that matter

Capital Forecasting

Use Capital Forecasting Reports to anticipate equipment upgrades and replacements, manage district budgets, back up future investments, and maximize equipment lifespans.

Facilities Management

Streamline district operations across multiple departments and teams with auto-routing, preventive maintenance, fleet management, work order management, and more.

Maintenance Management

Schedule work orders and preventive maintenance tasks, track assets, and use data-driven insights to improve school operations.

Inventory Management

Manage your school supplies and assets by tracking inventory levels, location, requested units, and purchase information, all at a glance. To ensure you stay on the right track, set alerts for low inventory levels and submit supply requests and purchase orders.

Event Scheduling

Coordinate events seamlessly for students, staff, and the community. Collect rental payments online, integrate with your district's Athletic Scheduling software, and integrate with your school's BAS system to adjust temperature and lighting based on event times.

Sensor Alerts

Detect equipment issues with water, temperature, humidity sensors with continuous, 24/7 sensor-based alerts. Get notified of issues and automatically generate a work order to resolve the problem right away.

Use reporting dashboards & gain valuable insight

View labor reporting, work order trends, equipment and inventory metrics, and plan capital expenditure budgeting to maximize your school's investments.
