PHENOLIC ATHLETIC LOCKERS

Solid Phenolic is the most durable material in the world for the manufacturing of athletic lockers. This material is a high density product made by applying heat and pressure to layers of paper saturated with a synthetic resin. This causes a chemical reaction known as polymerization, which transforms the materials into a high-pressure thermosetting industrial plastic.

PROPERTIES:

- 25 Year Warranty
- Graffiti & Wear Resistant
- Mortise and Tenon Construction
- Multiple Colors & Patterns
- School Logo Engraving
- Low Moisture Absorption
- Class A or B Fire Rating

POLYLIFE®

ATHLETIC LOCKERS

PolyLife® is solid plastic commonly referred to as HDPE (High Density Polyethylene). PolyLife® is an excellent material choice for athletic lockers. This durable material is resistant to graffiti and other damage. It's non-porous and won't delaminate or warp in areas with high moisture.
